- 1 On/off button
- 2 Light sensor
- 3 Magnetic charging port
- 4 Red light
- 5 Blue light
- 6 Green light
- 7 Charging cable

General information

These operating instructions are for the TrackiSafe Luggage 3G GPS Tracker, which will simply be referred to as 'tracker' in the following. They

contain important information regarding set-up and operation. Before using the tracker, please read the operating instructions carefully. This particularly applies to the safety notes. Failure to adhere to these operating instructions may result in severe injury or damage to the tracker.

The operating instructions are based on the standards and rules in force in the European Union. When abroad, you must also observe country-specific guidelines and laws. Keep the operating instructions for future use. If you pass the tracker on

to third parties, please be absolutely sure, to include these operating instructions.

Initial set-up

Installing and charging the battery

When you unpack the tracker for the first time, the battery is empty. Charge it as follows:

1. Connect the charging plug of the charging cable to the tracker with the magnetic charging port.
2. Connect the other end of the charging cable to the USB power adaptor and then to the power socket. Alternatively, you can also

connect the charging cable to a computer.

3. Charge the tracker for 12 hours. The red light will blink whilst charging. When the tracker is fully charged, the light will turn solid red.
4. Disconnect the tracker from the charging cable.

Turning the Luggage tracker on

1. Take the tracker outside so that it is in the open air.
2. Press and hold the on/off button for at least 3 seconds.

The green light on the front will start to flash.

3. Put the tracker down and wait for at least 15 minutes.

The tracker will carry out initial GPS positioning. This is required for the

device to function correctly. The tracker will then be ready for use and can be activated.

Please note: this procedure is only required the very first time the tracker is turned on.

Activating the Luggage tracker

1. Download the V by Vodafone app from the Apple Store or Google Play store.
2. Register or log into your V by Vodafone account and click on the + button to add a device.
3. Insert your tracker IMEI and follow the instructions to activate your price plan.
4. Download the TrackiSafe app from the Apple Store or Google Play.
5. Register or log into your TrackiSafe account.
6. Select "Activate device" in the operation menu and follow the instructions.

Functions

Button functions

ON/OFF button:

Press and hold the ON/OFF button to turn the tracker ON or OFF.

Briefly press the ON/OFF button once to check whether the tracker is on.

Please note: If the green light flashes, the tracker is ON. If no light comes on, the tracker is OFF.

Geofencing

A geofence is a self-defined virtual boundary. You will receive a notification in the TrackiSafe app when the tracker leaves this area or goes into this area.

To create a Geofence

1. Select the tracker in the TrackiSafe app.

2. Click on “Fence”.

3. Click on the “Create Fence” button.

A rectangular fence will be created around your device’s current location (or in the center of the map).

- You can also enter an address to position a fence.
- You can choose a pre-defined size.
- You can change the size by making the sides of the rectangle bigger or smaller, or by moving the rectangle.

4. Once your fence has been created, you can give your geofence a name and click on “Save”.

5. You will receive a notification in the TrackiSafe app every time your tracker enters or leaves this area. If you want to receive

email notifications as well, tap on "Share", then on "New contact". You will then be able to add an email address for this alert.

Speed alert

You will receive a notification in the TrackiSafe app when the tracker moves faster than the speed pre-defined by you.

1. Select the tracker in the TrackiSafe app.
2. Go to "Settings".
3. Enable the alert by checking the Speed alert box.
4. Click on "Save".
5. If you want to receive a notification via email as well, go to the Settings area in the app, swipe right on the "Speed alert", then tap on "Share" then on "New contact". You will then be able to add an email address for this alert.

Movement alert

You will receive a notification in the TrackiSafe app when the tracker starts to move.

1. Select the tracker on the TrackiSafe app.
2. Go to "Settings".
3. Set the "Start moving alert" ON.
4. Enable the alert by checking the "Start Moving alert" box
5. Click on "Save".
6. If you want to receive a notification via email as well, go to the Settings area in the app, swipe right on the "Moving Start alert", then tap on "Share" then on "New contact". You will then be able to add an email address for this alert.

Low battery alert

You will receive a notification in the TrackiSafe app when battery level is low.

1. Select the tracker in the TrackiSafe

app.

2. Go to "Settings".

3. Set the "Low battery alert"
ON

4. Click on "Save"

5. If you want to receive a notification via email as well, go to the Settings area in the app, swipe right on the "Low battery alert", then tap on "Share" then on "New contact". You will then be able to add an email address for this alert.

Light detection

The tracker has a light sensor, which can indicate if your bag has been opened. If light is detected, you will receive a notification in the TrackiSafe app.

To enable the Light Detection:

1. Select the tracker on the TrackiSafe app

2. Go to "Settings"

3. Set the "Light Detection" ON

4. Click on "Save"

5. If you want to receive a notification via email as well, go to the Settings area in the app, swipe right on the "Light Detection", then tap on "Share" then on "New contact". You will then be able to add an email address for this alert.

GPS signal and reception

The tracker uses GPS (Global Positioning System) technology to calculate its current location. It receives signals from GPS satellites in space. These GPS signals can be received when the device is used outdoors or in a vehicle.

The GPS signal is blocked, however, when the tracker is located inside a building or under a concrete roof. The signal may be blocked or diverted even if the tracker is

placed near a window. In such cases the device will use an alternative method to calculate its position. The position is determined through identification of a nearby WiFi router or mobile communications antenna. This is less precise than GPS data, and may be hundreds of meters from the tracker. If the device is using a cell-based location (also known as “GSM-based location”), you will be able to tell by a semi-transparent blue circle over the location.

Light meanings

Action	Light
Switch On: Press the on/off button and hold for 3 seconds	Green light blinks twice, the tracker starts up
Check if the device is connected to the mobile network: Press the on/off button and quick release	If the device is connected: Blue light turns on for 4 seconds
	If device is not connected: Blue light blinks on and off for about 5 seconds
Check if the device is ON or OFF: Press the on/off button quickly	Green light turns on briefly if the device is ON.
Switch Off: Press the on/off button and hold for 3 seconds	Green light turns on and red-light flashes, the tracker turns off
Low battery	Red light blinks
Battery is charging	Red light blinks slowly
Connected to a power source and battery is fully charged	Red light solidly lit up

Declaration of Conformity

The TrackiSafe hereby declares that the TRKM015TS tracker radio equipment model conforms with EU Directive 2014/53/EU. The full text for the EU Declaration of Conformity can be found on the following webpage:
www.trackisafe.com/conformity

Disposal

Disposing of the packaging

Dispose of the packaging ensuring that materials are correctly separated. Dispose of cardboard and carton as waste paper and dispose of foils via the recyclable material collection service.

Disposing of the tracker

(Applicable in the EU and other European countries with systems of separately collecting waste and recyclables).

Old devices cannot be disposed of as household waste!

If the tracker can no longer be used, all consumers are **legally obligated to separate old devices from household waste**, e.g. by disposing of them using a municipal/district collection point. This ensures that old devices are properly recycled and avoids negative environmental impact. Therefore electronic devices are labelled with the symbol shown here.

Batteries cannot be disposed of as household waste!

As a consumer, you are legally obligated to dispose of all

batteries at a municipal/district collection point or at a retailer, regardless of whether or not they contain harmful substances*, so that they can be disposed of in an environmentally friendly way.

*labelled as: Cd = cadmium, Hg = mercury, Pb = lead

Environmental Obligations

Green dot system represents that Trackisafe fulfils the obligations of the national packaging laws

(Packaging manufactures, fillers, retailers and importers), have jointly decided to find an organization or system to which Tackisafe can transfer their obligations. The task of these compliance schemes is to co-ordinate the

collection, sorting and recycling of used packaging.
